Résumé

Ce document présente un résumé des principales activités des flottilles de senneurs espagnols, français, italien, seychellois et NEI relevant de l'UE dans l'océan Indien depuis 1981 : efforts, prises par espèces et type de pêche (bancs sur objet, bancs libre et combinés), captures par unité d'effort, échantillonnages et poids moyen de la capture des principales espèces.

Depuis 2002, les données des flottilles européennes (Espagne et France) sont collectées dans le cadre du « Règlement sur la Collecte des Données » de l'UE (DCR, Reg. 1543/2000 et 1639/2001), remplacé en 2008 par le « Cadre communautaire pour la collecte, la gestion et l'utilisation de données dans le secteur de la pêche et le soutien aux avis scientifiques sur la politique commune de la pêche » (DCF, Reg 199/2008 et 665/2008). Les données des autres flottilles sont collectées par la SFA.

Les traitements des données (corrections spécifiques et structure des tailles par espèces) sont réalisés collectivement pour l'ensemble des flottilles.

Abstract

This document presents a summary of the statistics of French, Spanish, Italian, Seychelles and EU related NEI purse seine fleets fishing in the Indian Ocean since 1981: effort, catch by species and fishing type (log and free swimming schools), catch per unit of effort, sampling and mean weights for the main species.

Since 2002, data from the European fleet (France and Spain) are collected within the framework of the EU "Data Collection Regulation" (DCR, Reg. 1543/2000 and 1639/2001), followed in 2008 by the "Community framework for the collection, management and use of data in the fisheries sector and support for scientific advice regarding the Common Fisheries Policy" (DCF, Reg 199/2008 and 665/2008). Data from other fleets are collected by SFA (Seychelles Fishing Authority).

Data processing (species composition and size distribution) is done collectively for the whole fishery.

1 a – Purse seiners number according to their GRT category

1 b – Number of one degree squares visited

1 c – Carrying capacity, fishing and searching days

1 d – Number of sets (log and free) and percentage log sets

Figure 1: Fishing effort of the European and associated fleet :
Purse seiners number by GRT category (1 a); Number of one degree squares visited for different levels of effort (1 b);
Carrying capacity, fishing and searching days (1 c); Number of log and free schools sets and percentage of log sets (1 d)

2 a – Log schools

2 b – Free swimming schools

2 c - Combined

Figure 2 : Catches by species and fishing effort according to the fishing mode

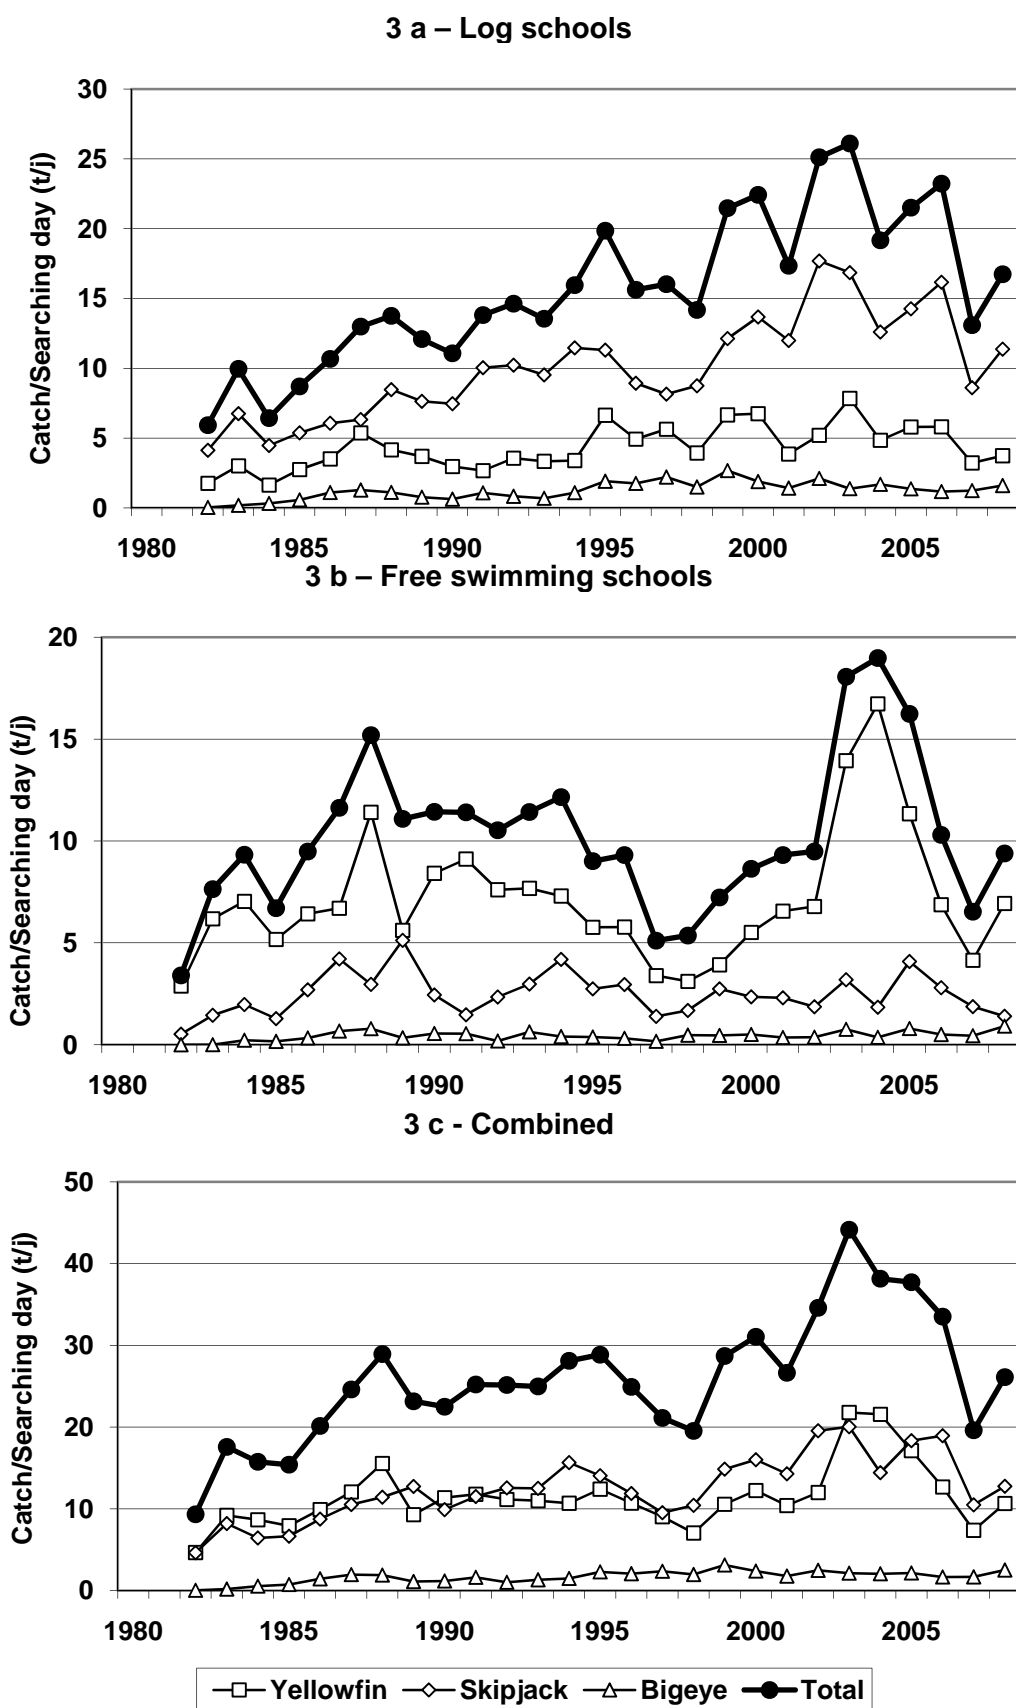

Figure 3 : Catches per unit of effort (tons by searching day) according to the fishing mode

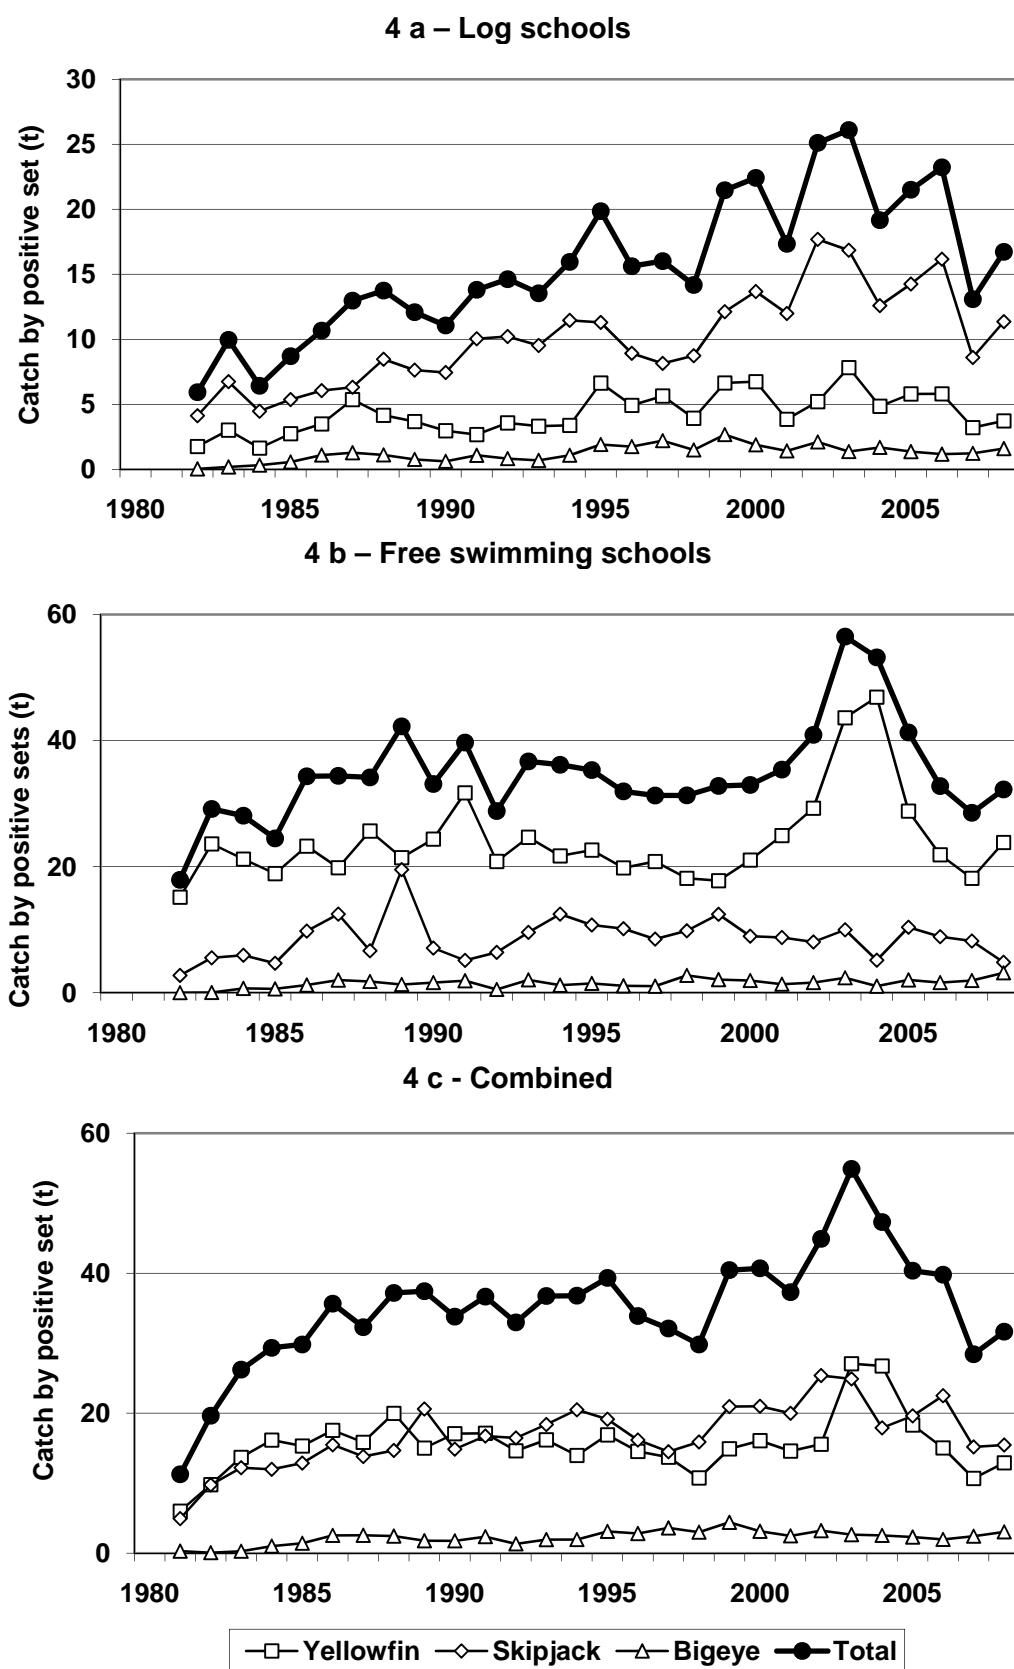

Figure 4 : Catches per unit of effort (tons by positive set) according to the fishing mode

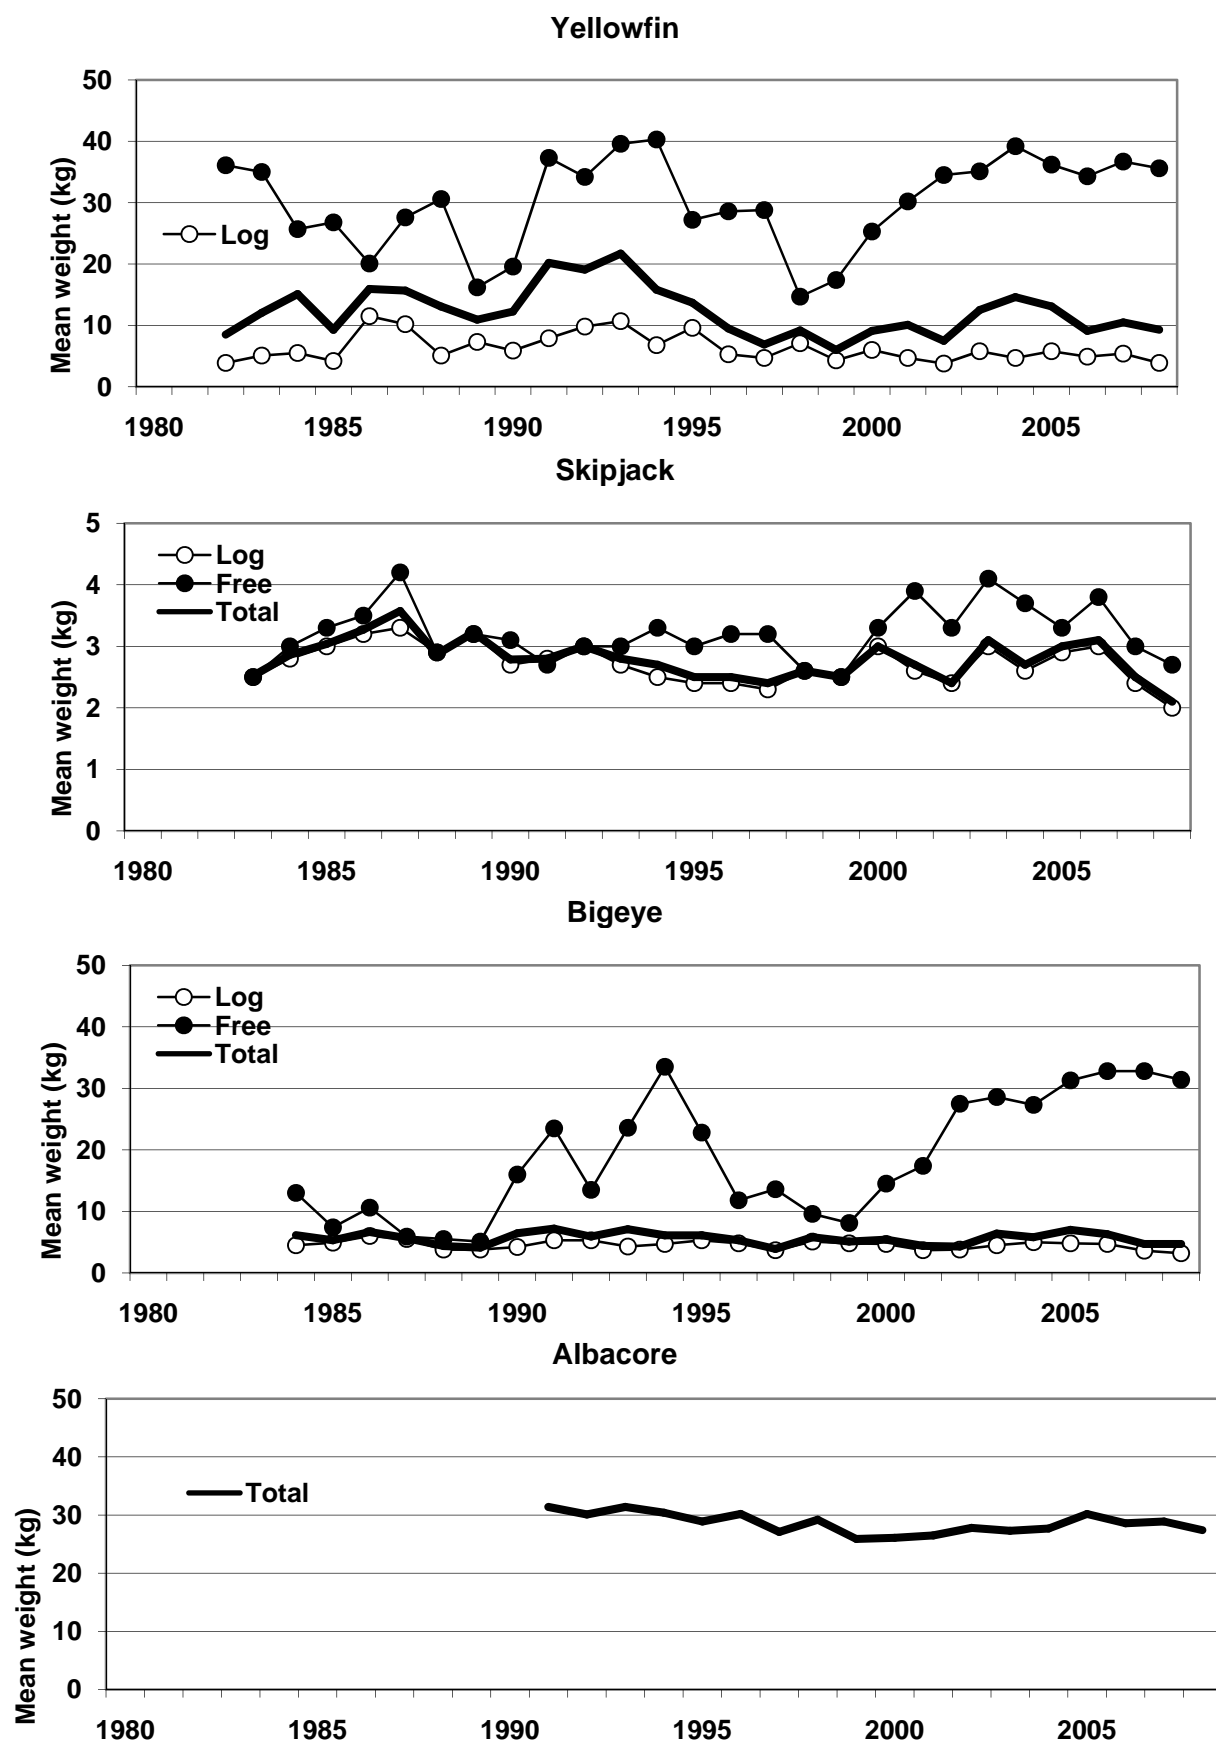

Figure 5 : Mean weights of catches by species and fishing mode

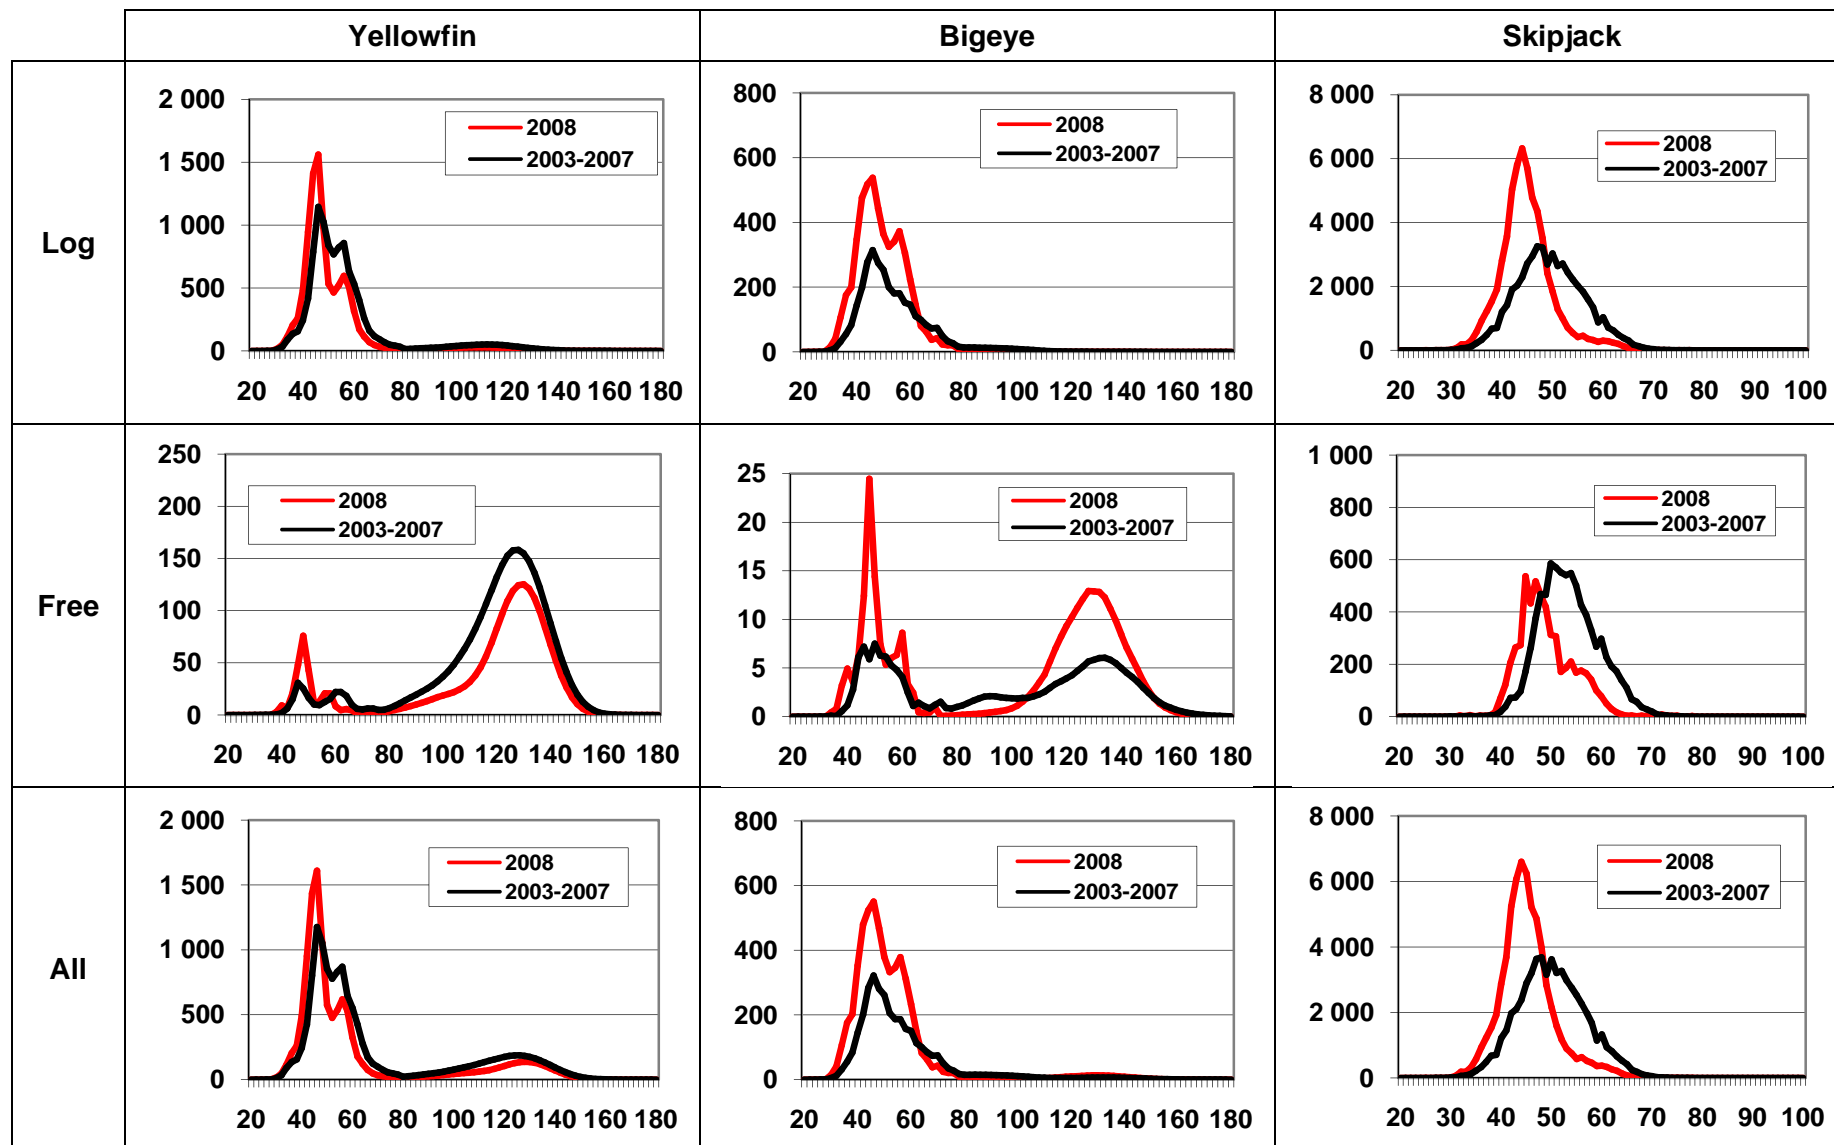

Figure 6a: Size distribution (in numbers) of the main purse seine fleets catches by species in 2008 and for the average 2003-2007 period

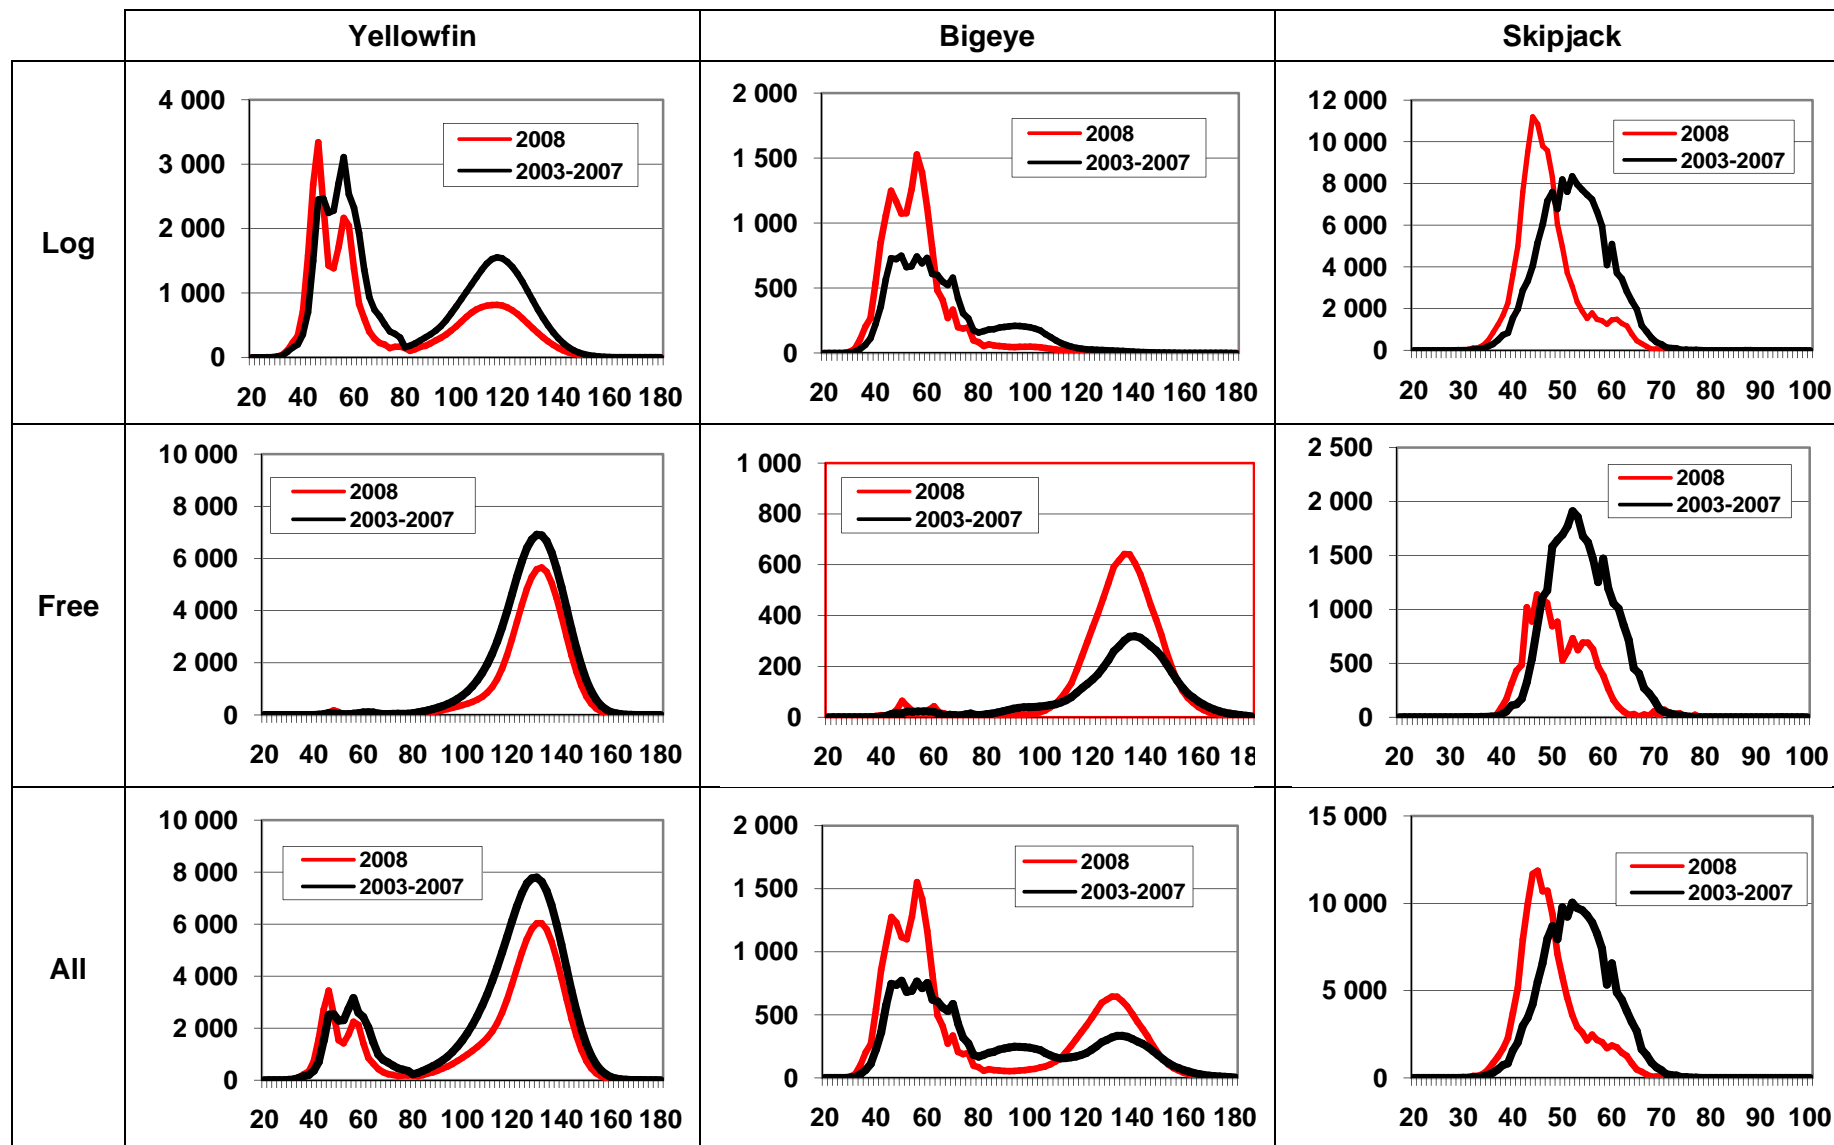

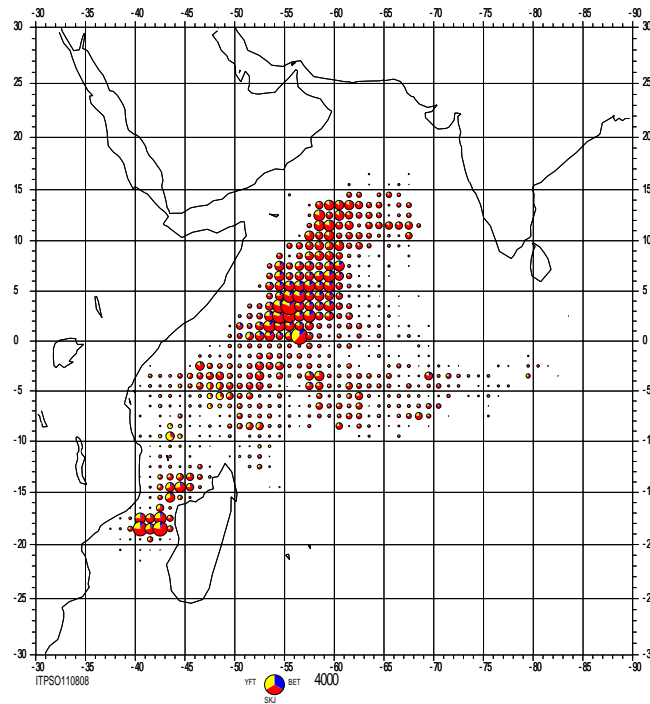

Figure 6b: Size distribution (in weight) of the main purse seine fleets catches by species in 2008 and for the average 2003-2007 period
